

BONUS STRATEGIES TO DEEPEN YOUR DETOX/ CLEANSE

Get a massage!

Although this sounds like a luxury, massage is highly effective at helping the lymph system mobilize and drain toxins. Plus, a massage will help dial down your nervous system by triggering the parasympathetic system. You will switch from an adrenaline, cortisol state to a calm, relaxed state. This will help balance your hormones and help stabilize your blood sugar.

Head to a yoga class

A yoga class allows your body to sweat out toxins, and spinal twists are considered highly cleansing to the body. Many yoga studios offer a free first class; be sure to check in your area.

Take an Epsom salt bath 2-3 times during the detox week

If you have a tough time sleeping, this is a great way to help your nervous system relax before bed. Be sure to use 2 cups of Epsom salts per bath for the highest cleansing effect. Epsom salts are well known for drawing toxins out through the skin.

Try dry skin brushing

Take a stiff natural bristle brush and lightly brush your skin in upward strokes, starting at the feet. Then move towards the arms beginning at the hands, always brushing toward your heart. You can do this before bed or before you get in the shower. Dry skin brushing stimulates the skin, increases lymphatic drainage and helps bring blood to the surface of the skin.

Move your body daily

Take a walk outdoors, go for a swim or simply dance around the house. Find an activity that makes you smile and gets your body in action. You will increase your circulation, sweat and change your thoughts.

Clean up your skin care regimen

The skin is the body's largest detox organ, and many things we put ON our skin ends up IN our bloodstream. For the week of the detox, ditch the chemical-laden lotions and try coconut oil, raw sesame oil, or Ayurvedic body oil instead. You won't believe how great your skin feels.

If you find yourself tired, take a nap

Detoxification is a high-energy process. It is normal to feel a little drained. Your body is working hard to mobilize, process and unload toxins. Listen to your body and get enough rest so your body can function optimally.

Head to your local sauna to sweat and release toxins

Sweating in a sauna helps get your lymph system moving, which is needed to allow toxins to mobilize from your fat and release from your system.

Finish each shower with a cold splash

This is a practice known as hydrotherapy that helps direct blood to the internal organs.

Tongue scrape in the morning

To tongue scrape, you'll need to buy a tongue scraper. Simply stick your tongue out and run the scraper along your tongue from back to front in a sweeping motion. Try to get as far back as you can without gagging, and be sure to scrape the entire surface area of your tongue. Tip – do this over the sink - you may be surprised at how much gunk comes off! Despite the name, tongue scraping doesn't hurt. It's a great way to remove bacteria from the tongue and can help reduce cravings by exposing new taste buds and decreasing remnants of food that can cause cravings.
